

Konala S V Murali Ramakrishna Reddy

B.Tech Computer Science student

 konalamuralizo06@gmail.com

 +91 9492054444

 Visakhapatnam, Andhra Pradesh

Summary

A motivated and detail-oriented B.Tech Computer Science student with practical experience in Artificial Intelligence and Machine Learning through a hands-on internship. Proficient in multiple programming languages and passionate about developing innovative software solutions. Seeking to leverage technical skills and a strong work ethic in a challenging software development role.

Experience

AI/ML Intern 05/2025 – 07/2025 | Visakhapatnam
Robocoupler Pvt Ltd

- Developed and trained custom object detection models using Python and Roboflow datasets, gaining hands-on experience in computer vision.
- Assisted in implementing a face recognition system with pre-trained Caffe models, contributing to a real-world AI application.
- Collaborated with a team on the initial development phases of a basic mobile application.

Frontend Development Intern 09/2025 – 10/2025 | Remote
CodeAlpha

- Created modern, interactive frontends using HTML, CSS, and JavaScript.
- Improved website speed and responsiveness for better user experience.
- Worked with mentors to refine code structure and UI consistency.

Python Developer Intern 09/2025 – 11/2025 | Remote
Codec Technologies

- AI Chatbot Development: Developed a responsive chatbot platform using Flask and Tailwind CSS that integrates with Google Gemini 2.0 Flash to provide intelligent real-time responses and handles API quota limits.
- Financial Data Visualization: Built an interactive Stock Market Dashboard using Streamlit and Plotly to visualize real-time ticker data, Market Cap, and historical price trends.
- Backend Logic & Utilities: Engineered modular Python applications, including a robust arithmetic engine and API diagnostic tools.

MERN Full Stack Intern 10/2025 – 01/2026 | Remote
UptoSkills

- Built a full-stack Human Resource Management System (HRMS) using MongoDB, Express, React, and Node.js.
- Engineered responsive user interfaces by translating Figma designs into reusable React components.
- Optimized application UI/UX and cross-device compatibility utilizing Tailwind CSS.
- Collaborated with the development team to meet project milestones and deliver clean, maintainable code.

Education

Bachelor of Technology, Computer Science Engineering 2023 – 2027 | Visakhapatnam
Andhra University, Visakhapatnam

Intermediate Education 2021 – 2023 | Visakhapatnam
Ascent Junior College, Visakhapatnam

High School Education 2016 – 2021 | Srikakulam
Bhashyam High School, Srikakulam

Skills

- **Languages:** Python | Java | C++ | C | HTML | CSS | JavaScript | React | Node
- **Frameworks & Technologies:** AI/ML Concepts | Computer Vision | Caffe | Roboflow
- **Tools & Platforms:** Linux | Git | GitHub
- **Databases:** MongoDB

Certifications

- Full stack development With AI internship - Robocoupler
- Frontend development internship-CodeAlpha
- Python Developer Intern - Codec Technologies
- MERN Full Stack Internship - Uptoskills
- Quantum Fundamentals- Amaravati Quantum Valley
- Basics Of Artificial Intelligence And Basics Of Machine Learning - Simplelearn
- Python Programming - Skill India
- MicroSoft Security Foundations - Microsoft

Projects

Object Detection System

- Built a system to identify and classify objects within images by training models on specialized datasets from Roboflow.
- Responsible for data preprocessing, model training, and performance analysis to ensure accuracy.

Face Recognition Module

- Implemented a proof-of-concept face recognition tool using the Caffe deep learning framework.
- Focused on applying theoretical knowledge of neural networks to a practical security application.

AI Chatbot Application

- Built a full-stack web chatbot using Python, Flask, and the Google Gemini API for dynamic, intelligent user interactions.

Real-Time Stock Market Dashboard

- Engineered an interactive financial data dashboard using Python and the Streamlit framework.
- Utilized the yfinance library to fetch real-time and historical stock market data, and pandas for data manipulation.

Interactive Image Gallery

- Built a dynamic, responsive image gallery using HTML, CSS, and vanilla JavaScript.
- Implemented dynamic DOM manipulation to allow users to filter images by categories (Nature, Architecture, Portrait, Abstract).

Modern Web Calculator

Designed and developed a browser-based calculator featuring a modern "glassmorphism" UI design.

- Programmed comprehensive mathematical logic and event listeners in JavaScript to support both mouse clicks and keyboard inputs.

Professional Portfolio Website

- Developed a fully responsive, single-page personal portfolio utilizing Tailwind CSS.
- Incorporated advanced CSS animations, sticky navigation, and mobile-friendly hamburger menus.

UptoSkills- Human Resource Management System Website

- Built a Human Resource Management System (HRMS) using the MERN stack (MongoDB, Express, React, Node.js).
- Translated Figma designs into functional, responsive React components.
- Styled the user interface with Tailwind CSS for optimal cross-device compatibility.
